E - scoot project

E-scoot Brief

Our company specializes in offering high-quality electric scooters. Our scooters are known for their energy efficiency, easy charging, low pollution, and minimal maintenance and operating costs.

We focus on incorporating modern technologies into our products, such as fast-charging systems, long-life batteries, and integration with smartphone applications for vehicle monitoring.

Additionally, our scooters are equipped with front fans for enhanced comfort. Our company was founded with the vision of revolutionizing personal transportation by providing sustainable and cost-effective mobility solutions.

Market Research

SHARED IN MOBILITY REPORT 2023

Full Report

157 MILLION TRIPS

Across the U.S. and Canada in 2023

SHARED IN MOBILITY REPORT 2023

In cities across the U.S. and Canada, shared micromobility is a popular and growing form of public transportation, often replacing short car trips and extending the reach of public transit. In just 13 years, people have taken 887 million trips on shared bikes and scooters in the U.S. and Canada.

INCREASED RIDERSHIP

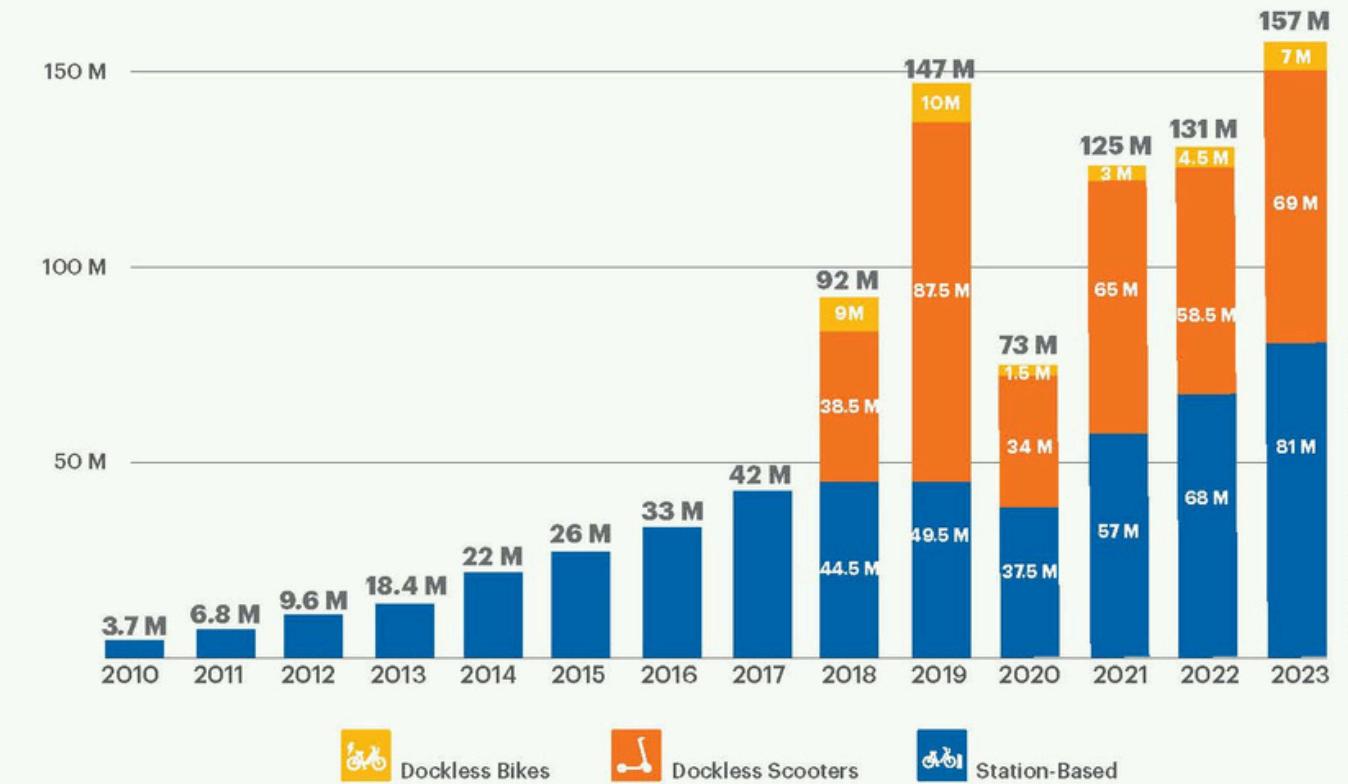

E-SCOOTER TRIPS ROSE BY 15% IN 2023. IN CANADA, RIDERSHIP JUMPED FROM 2 MILLION IN 2022 TO 4 MILLION, MAKING UP 17% OF THE COUNTRY'S SHARED MICROMOBILITY USAGE.

DOCKLESS E-BIKE EXPANSION

WHILE E-SCOOTER RIDERSHIP IS CLIMBING, DOCKLESS E-BIKES REMAIN THE SMALLEST SEGMENT. CANADA SAW A NEARLY FOURFOLD INCREASE IN TRIPS (FROM LESS THAN 100,000 TO 300,000), AND THE U.S. EXPERIENCED A 50% RISE (FROM 4.5 MILLION TO 6.7 MILLION TRIPS).

Shared Micromobility Ridership in the U.S. and Canada, 2010-2023

Dockless Bikes

Dockless Scooters

Station-Based

Total trips on shared micromobility increased by 20% from 2022, surpassing the pre-pandemic 2019 peak of 147 million trips across both countries. People took 133 million trips on shared micromobility in the U.S. and 24 million trips in Canada. Shared micromobility trips in Canada increased by a whopping 40% in 2023, due to the continued expansions of station-based systems and the introduction of dockless e-scooters into new markets. Trips in the U.S. increased by 16% in 2023, driven largely by the continued growth of e-bike trips on larger station-based systems.

Yet despite the overwhelming popularity of these systems, many cities are grappling with the challenges of providing this essential service while facing limited financial and operational resources. A volatile private operator landscape coupled with increasing user costs threatens to limit the potential for shared micromobility to be affordable and accessible to all. Shared micromobility is at an inflection point; it is imperative that cities design durable operational models to ensure the long-term viability of this increasingly relied-on transportation mode.

SHARED IN MOBILITY REPORT 2023

FUNDING ISSUES

SHARED MICROMOBILITY SYSTEMS ARE FACING FINANCIAL INSTABILITY, LEADING TO BANKRUPTCIES, JOB LOSSES, AND RISING COSTS FOR USERS, MAKING THEM LESS AFFORDABLE THAN TRADITIONAL PUBLIC TRANSPORT.

Voice and Tone

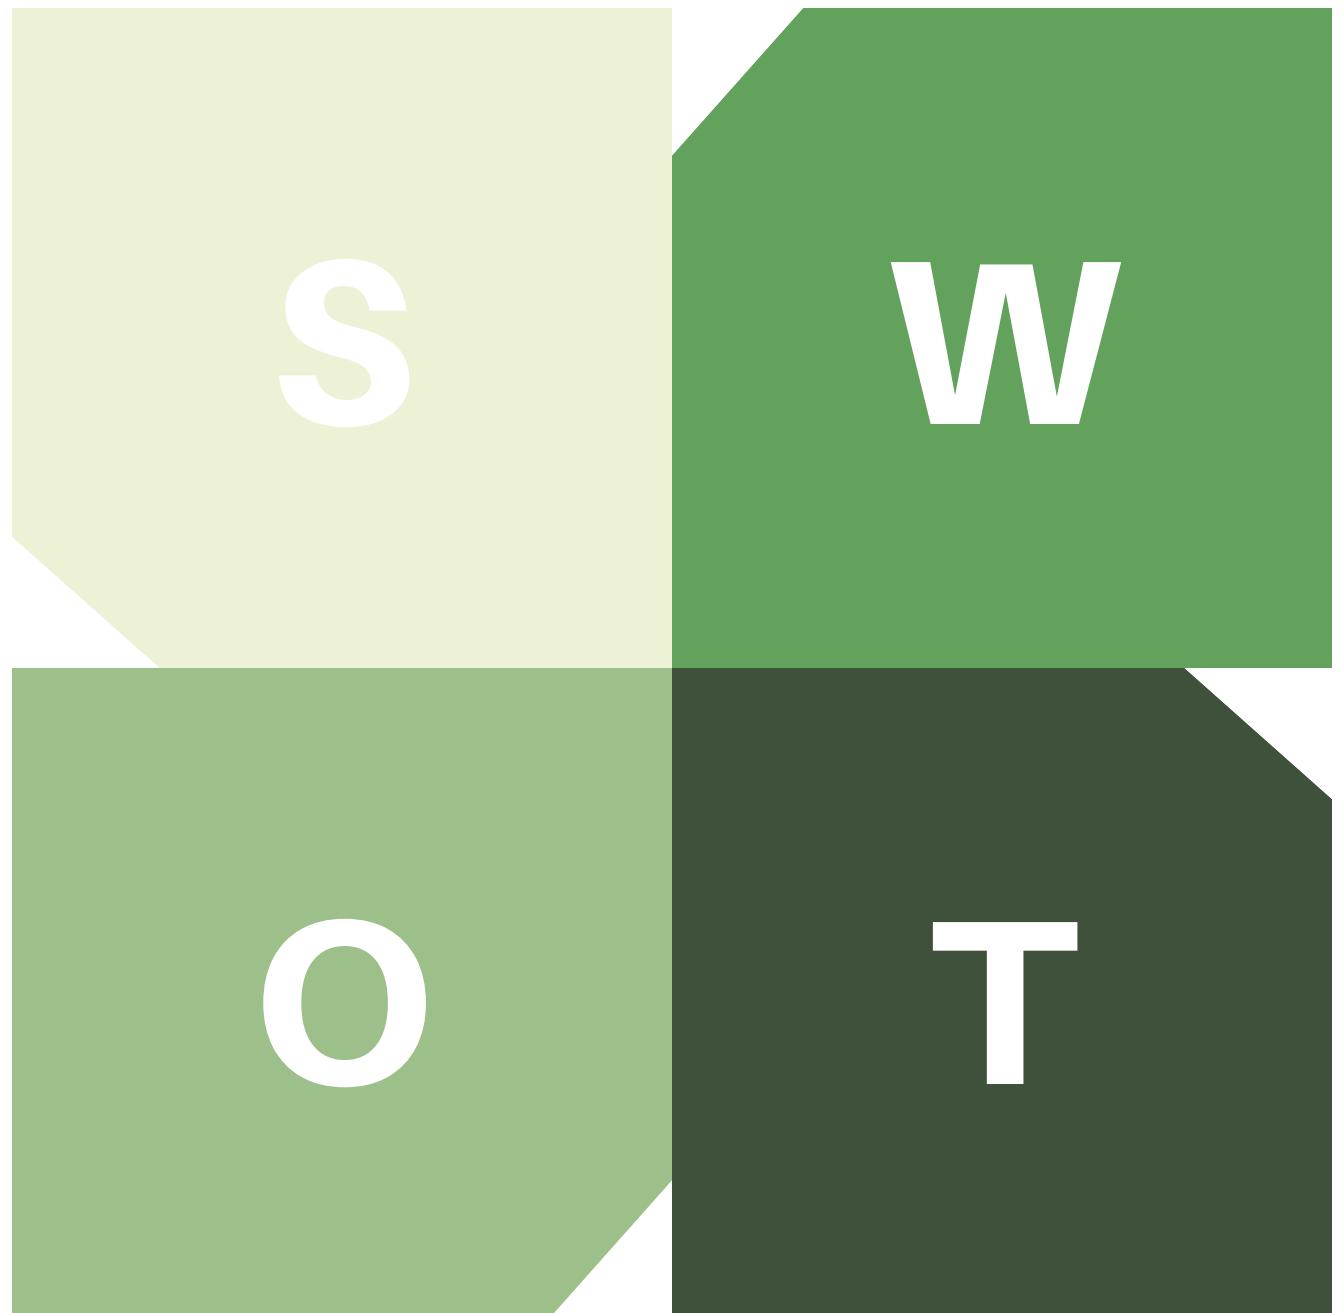

Our brand voice is friendly, and we choose this type of tone because 60% of our targeting is youth reflecting our commitment to exceptional customer service. Our tone adapts depending on the context and audience.

STRENGTHS

- We offer a warranty on scooter parts
- Our after-sales service is reliable
- Our scooters use modern batteries that make them more efficient in energy consumption

OPPORTUNITIES

- The e-scooter market is growing due to increased environmental awareness.
- We can seek partnerships with suppliers to improve our offerings and offer discounts to customers.
- Participating in e-vehicle events can help us reach more customers.

WEAKNESSES

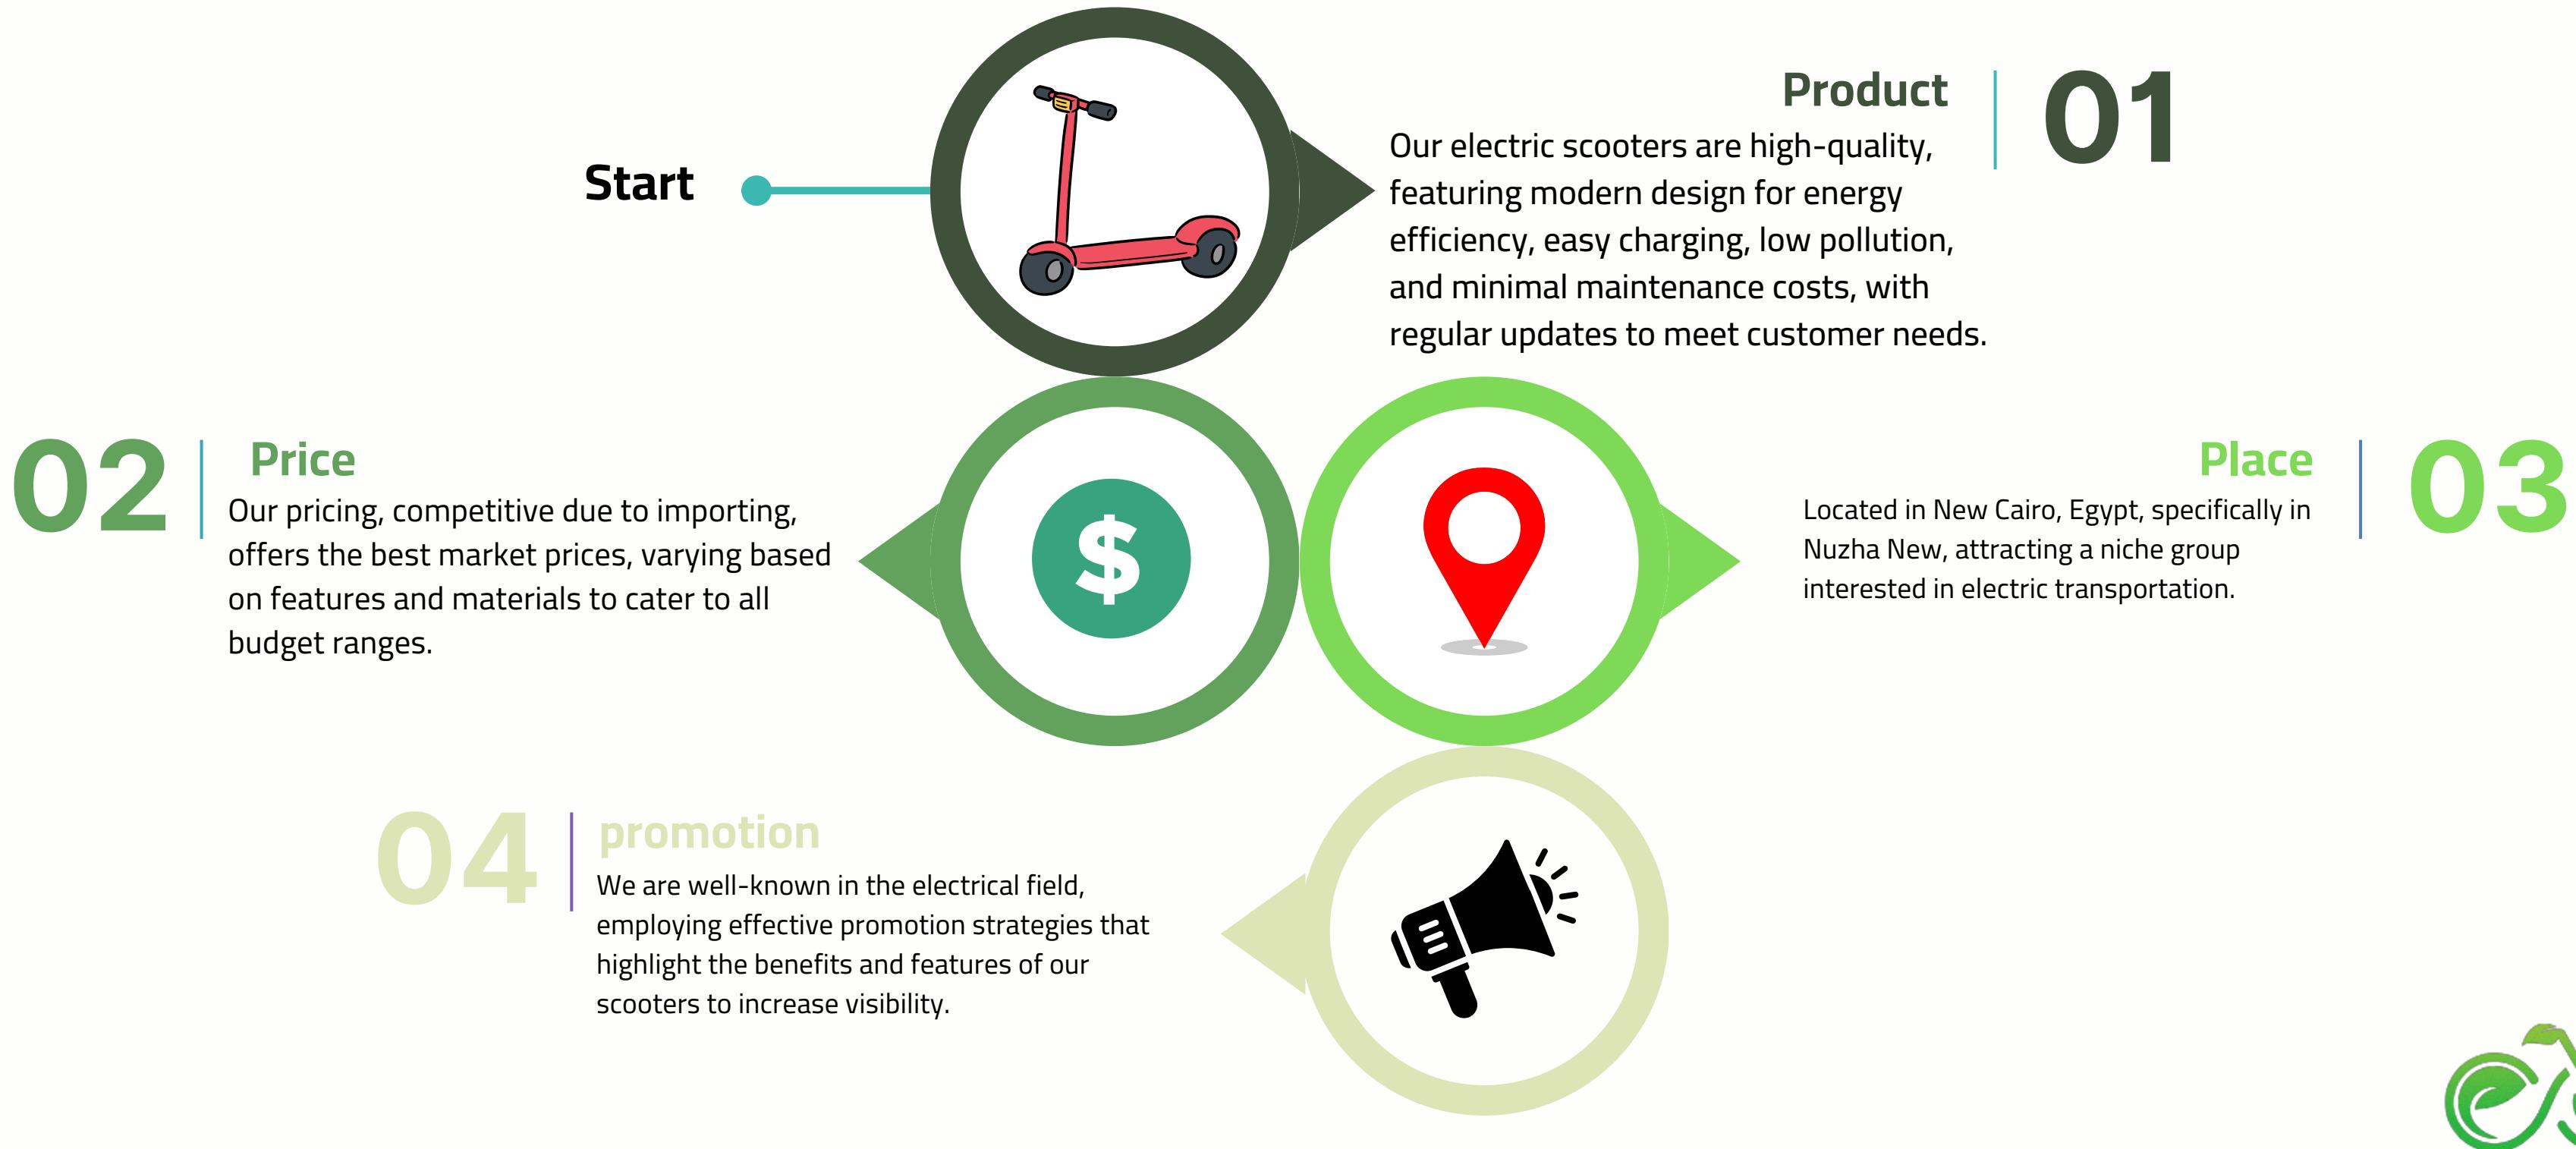

- Our current website needs improvement.
- It's challenging to find spare parts at affordable prices.
- We require a significant amount of capital.

THREATS

- Economic changes may reduce customers' purchasing power.
- Rapid technological advancements could change customer preferences.
- Competition from large online and local stores is a significant threat.

Brand Guidelines

Buyer Persona

This is Omar Hassan

Age: 30

Occupation: Urban Professional

Location: Cairo, Egypt

Income: 12,000 EGP/month

Tech Savviness: High

Commute Distance: 10-15 km/day

Marital Status: Single

Background And **Motivations**

Omar is a tech-savvy professional living in Cairo. He commutes daily and wants to save time, money, and reduce his carbon footprint. An e-scooter appeals to him for its convenience, eco-friendliness, and ability to beat traffic. However, he's concerned about road safety and limited charging infrastructure.

Challenges and Buying Behaviors

Omar prioritizes durability and cost-efficiency but is wary of high upfront costs. He relies heavily on online reviews, comparisons, and friend recommendations. Installment payment options are important to him.

Goals And Objectives

Omar aims to reduce commuting time and expenses while supporting a sustainable lifestyle with a reliable, long-lasting e-scooter.

Analysis

Competitive

Analysis

Competitive Analysis

Competitive analysis allows us to understand where we are as a brand and how our competitors work. We will start by identifying who we are and who our competitors are.

Next, we will identify attributes they are doing right and create a perceptual map. In the perceptual map, we will identify a criteria and rank these attributes as high or low.

- 1 Review our brand and competitors.
- 2 List key attributes.
- 3 Identify criteria and rank attributes as high or low.
- 4 Tool Used to Collect Competitors Data : Fanpage Karma

Recommendations and Improvements

More Dynamic Content

Move beyond just photos. We should introduce videos of real users, behind-the-scenes footage, and product features in action. Show how the Scooter performs on the streets with real commuters.

Add interactive elements like polls or quizzes to keep the audience engaged—something simple like, "Which E-scoot is right for you?"

Video Showcases

Prioritize videos over static images, short clips showing the E-scoot in real-life settings, focusing on smooth rides, features, and customer experiences.

Highlight Customer Experiences

Real riders telling their stories can boost trust. Let's feature short clips or quotes from people who use E-scoot daily. Adding a feature like "Rider of the Month" will put the spotlight on customers

Customer Testimonials

Feature real riders, sharing their stories on how E-scoot has improved their daily commute, adding credibility to the brand.

Video Showcases

Prioritize videos over static images, short clips showing the E-scoot in real-life settings, focusing on smooth rides, features, and customer experiences.

Influencer Collaborations

Partner with influencers in the urban mobility or eco-friendly niche to reach a wider audience and create relatable content.

Interactive Posts

Use polls, Q&A sessions, or simple quizzes to get the audience engaged while highlighting the scooter's key benefits.

Sustainability Focus

Push the eco-friendly benefits of E-scoot, emphasizing how it helps reduce emissions and save on transportation costs, tying in with global environmental initiatives.
